1.) Homepage

- need images for slider
- using the generalLayout.css for divs such as the wrapper and slider >> styles includes main divs in most pages, especially the general layout of things
-

2.) Footer

- address and such is added
- "Back to Top" link included
-

3.) Company Name

- it is "Lotus"

4.) Nav Bar update links

- Still got few needed to link
- Changes should be made in the header.html

5.) Others:

- nav div should be in header.php instead of nav.php >> which means only one file is needed
- **NEED A REFERENCE PAGE**
